Brooklyn, NY | (347) 761-1271 | tmowreen97@gmail.com | Portfolio | GitHub | LinkedIn | Blog

Creative and passionate problem solver with experience building full stack applications using React, JavaScript, HTML, CSS, Ruby, Rails and SQL. With a focus in frontend web development, I create with the intention to improve and simplify the user experience. Dedicated and eager to contribute to the future of technology and develop user friendly and engaging applications for everyone.

SKILLS

JavaScript, React, HTML, CSS, NextJS, Tailwind CSS, FramerMotion, Ruby, Rails, SQL, Git, PostgreSQL, ActiveRecord, Python
Adobe- inDesign, Illustrator, PhotoShop

TECHNICAL PROJECTS

IDEA-AEC WEB REDESIGN *(ongoing)* | GitHub
Freelancing project redesigning IDEA Architectural Engineering Consutlant's website.
- Utilizing NextJS, TailwindCSS, FramerMotion focusing on UI/UX design.
- Communicating with marketing team to establish website goals to ensure perfect final product.

PORTFOLIO | GitHub | Website
Fully deployed application with a focus in user interaction and experience showcasing my experience and skills.
- Developed fully deployed front-end application utilizing NextJS, TailwindCSS and FramerMotion.
- Implemented FormSubmit.co to have a functioning contact form without back-end code.

SELF/FULL: Live a full life with self-care. | GitHub | Demo
Interactive app that inspires users to practice self-care through facts and activities they can incorporate into their lifestyle.
- Modeled custom database schema and RESTful API using Ruby on Rails, Active Record and PostgreSQL.
- Developed an interactive front-end design using React, JavaScript, HTML and CSS focusing on user experience.
- Implemented useContext for state management, useQuery and Axios for asynchronous data fetching from API.
- Authenticated and safeguarded user information with BCrypt in Rails along with ActiveRecord validations for efficiency.

CRITIQUER: Where everyone's a critic. | GitHub | Demo
Application intended for movie buffs, where the user is a critic and can view movie details and leave reviews alongside other users.
- Delivered a JavaScript, React, HTML and CSS frontend using useContext for state management.
- Created a RESTful API for the backend with a custom database schema using Ruby on Rails, Active Record and Postgres.

MOVIEZONE | GitHub | Demo
A display of movies and genres intended to help a user keep track of their favorite movies and find new ones.
- Built a web basic API with Sinatra, Ruby on Rails and Active Record. Achieved a JavaScript, React, HTML, CSS frontend.
